

Kitchen to Compost

Great effort Warrnambool! Using our FOGO bins we have diverted 800 tonnes of foodwaste from landfill this year.

Keep up the good work and remember that **ALL** foodwaste belongs in your FOGO bin...

Fruit

Cheese

Bread

Eggs & Shells

Garden Clippings

Take-away food

Meat

Vegetables

Cakes

Coffee Grounds

Tea Leaves

Grass

Bones

BIN PACKING TIPS

- Pack FOGO material loosely.
- Avoid stamping down or packing in the contents to make more room.
- If your bin is filled with only grass clippings or only leaves ensure they are loosely packed.
- Alternate or layer drier organic materials such as twigs & prunings with grass clippings.
- If there's still a few days before collection, leave grass clippings out to dry and place them in the bin just before collection.
- Place drier items such as loose prunings on the bottom of the bin first before placing your grass clippings in the bin.

HEAVY BINS

If you are struggling to move your FOGO bin, it's too heavy for the hydraulic arm on the collection truck to lift.

Moving bins that are too heavy may also cause injury, so remove some of the material out of the bin and leave it for next time.

Soil does not belong in your FOGO bin. Shake soil off plant roots when weeding and place any excess soil back on your garden.

To learn about what liners can be used in your FOGO bin, see the Kitchen caddies and Liners factsheet at
